

Since 2010 **Country Solar NT (CSNT)** has been providing quality, affordable solar Photovoltaic (PV) and energy efficient electrical solutions to local homes, businesses and government buildings throughout the Top End.

Darwin City Council, Nightcliff swimming pool rooftop installation, 58 kW.

# GO COUNTRY SOLAR NT NOW

## AWARD-WINNING TERRITORY SOLAR SPECIALIST

Darwin-based CSNT is locally owned and operated by Jeremy and Pam Hunt. 'It evolved because of our desire to live more sustainably and reduce expensive operating costs,' said Jeremy. 'Keeping abreast of utility rules, regulations and government policy has now seen us grow to be the largest PV installer in the NT. The company works in all but one of the Solar PV markets. These markets include residential, off-grid, small commercial and large commercial. Renewables is a very fast-evolving industry.' Staff are fully committed and passionate about the industry and they keep up to date on equipment advances and industry requirements. 'Our internal procurement philosophy means the equipment we choose to quote with is designed for the climate and a building's specifics, our on-hand structural engineers ensure we have 100 per cent compliance with cyclonic building code. We're passionate about solar energy and bringing it to everyone.' It's this local owner customer-based approach that will continue to see CSNT continue to grow and also saw them win the 2015 NT Telstra Business of the Year.

Darwin Trailer Boat Club, Fannie Bay 110kW.

**WE'VE BEEN SEEING 60 TO 70 PER CENT SAVINGS ALREADY. IT'S BEEN WORTH THE WAIT TO GET IT RIGHT**

Raffles Plaza, Darwin City, solar carpark, 78 kW.

### RAFFLES PLAZA

A need to save on building electricity costs led Raffles Plaza administration manager Laurie to seek solar energy options. 'Jeremy at Country Solar NT has been working on solutions with us for five years,' she said. 'It wasn't straightforward, but was finally installed in our carpark area in May and we've been seeing 60 to 70 per cent savings already. It's been worth the wait to get it right. 'CSNT did extensive testing of sites, checking shadows and finding the right panels and frames that eventually came from Germany and they got all special permissions. I'd definitely recommend Jeremy and his team anytime. Not only are they local, they're professional and always there. They made the overall process stress-free for us.'

A solar analysing tool models shading impact for the whole year.

Our team is experienced in the service and maintenance of our systems.

Raffles carpark is the second of several solar car park structures Country Solar NT has installed.

Hibiscus Tavern, Leanyer, 100 kW.

**COUNTRY SOLAR NT WERE EXCELLENT, SO MUCH SO I HAD THEM INSTALL A SYSTEM AT MY HOME. IT'S ALREADY GIVING US A RETURN OF 20 PER CENT AND WILL PAY FOR ITSELF WITHIN FIVE YEARS**

### HIBISCUS TAVERN AND RESIDENCE

Hibiscus Tavern installed solar in May 2016 and the management is extremely pleased with the 33 per cent return they're now getting on the investment. 'It'll pay for itself within three years,' says Paul Palmer. 'It wasn't an easy job, but Jeremy and the team at Country Solar NT persevered and have ensured we got the best. They were excellent, so much so I had them install a system at my home. It's already giving us a return of 20 per cent and will pay for itself within five years.' Both of Paul's systems are linked to an internet app so he can quickly see how they're functioning. 'Everyone should go solar, especially while the rebates are on offer. It's a no-brainer. And CSNT is the only truly local team to see. They are there afterwards if needed.'

## GO COUNTRY SOLAR NT NOW

Cellarbrations, Pinelands, 100 kW. Engaged Country Solar NT during the building stages.

Coleman's Printing Solar Carpark 60 kW, alongside a 40 kW rooftop system

Providing shade for parking and power.

**JEREMY HAD SOME REALLY UNIQUE SOLUTIONS AND NOT ONLY REDUCED OUR POWER BILL BY \$8000 A MONTH HE ALSO CREATED SHADED CAR PARKING FOR OUR STAFF AND CLIENTS WITH THE PANELS THERE**

The busy office at Country Solar NT.

### CELLARBRATIONS SUPERSTORE

'Having previously used Jeremy and Country Solar NT, there was only one choice for solar at our new Cellarbrations One Stop Superstore at Pinelands. They're hassle free and local,' said Gary Coleman. 'Eighteen months earlier I'd used them for our offices in Cavenagh Street. Jeremy had some really unique solutions and not only reduced our power bill by \$8000 a month he also created shaded car parking for our staff and clients with the panels there. 'At One Stop we can see we're rarely using anything from the grid and that's amazing considering the huge chillers we have. We're also hooked into battery back-up when it's required. Going solar with CSNT is the smartest move any business can make.'

### ANSELL OFF-GRID HOUSE

Wanting to create an environmentally sustainable living space Shaun and Jennifer Ansell bought a beautiful large block just out of Darwin. 'Having no amenities was the drawcard,' said Jennifer. 'We wanted to start from scratch.' Purchasing an old RAAF Darwin elevated house, they then wanted a high quality off-grid solar system. 'Right from the start, we were very impressed with Country Solar NT. Their attention to detail during quoting, the design, installation, project management and even follow-up has been exemplary,' she adds. 'For over a year now, including during the wettest wet season on record, we've enjoyed all our amenities. No hassles. We're extremely pleased with the capability of our solar system and we'd happily recommend Country Solar NT to anyone looking at going 'off-the-grid'. You can save heaps with the system and CSNT.'

Shaun and Jennifer Ansell, Off Grid.

Batteries installed in less than 100 days, take that Elon Musk!

**FOR OVER A YEAR NOW, INCLUDING DURING THE WETTEST WET SEASON ON RECORD, WE'VE ENJOYED ALL OUR AMENITIES. NO HASSLES**
