B30 Eclipse \$199.

# INNOVATION. HIGH TECHNOLOGY. LIGHTNESS.

Vision is our most important human sense. Yet we are often careless about protecting our eyes from harmful UV rays. Bolon lenses are polarised and provide perfect protection in our tropical climate combined with affordable quality and style.

Designed in Italy, Bolon eyewear stands for exquisite style, quality materials and technological artistry. 'Bolon embraces individuality. Customers can express their fashion style while combining function and elegance,' said optometrist Helen Summers. 'Their designs aim to inspire women and men with unique, modern and fashionable looks.' Bolon high-definition polarised lenses with anti-reflective coating effectively block glare and harmful UVA, UVB and UVC rays. The shatter-proof lenses are safer and lighter than glass lenses and the vacuum coating is water repellent, scratch/stain resistant, durable and easy to clean. Bolon's Italian 'Mazzucchelli' acetate offers outstanding colours and texture and the Memory Resin TR90 made in Switzerland guarantees lightness and resistance.

Bolon makes luxury accessible and is exclusively available at Helen Summers Optometrist, 105/12 Salonika St, Parap. Ph: 8995 9595.

Tropical wallpaper design by Definitive Decorating. Flower dress from Cue, Casuarina Square.
