

TERRITORY LASER CLINIC LEADS THE WAY IN SKINCARE TECHNOLOGY

The team at Territory Laser Clinic have been helping people achieve beautiful skin for years. And now they have the latest breakthrough in skincare technology to prove it!

Fully qualified Dermal Therapists Holly Copping left, and Stephanie Mac.

Spider veins, Rosacea and acne.

INTRODUCING THE NEW 7TH GENERATION VISIA COMPLEXION ANALYSIS SYSTEM

UV sun damage assessment.

Wrinkles and creases in the skin.

VISIA rotates around the client to capture left, right and frontal facial views.

TruSkin Age determines your overall skin condition and age.

It enables us to see all the way down to the basal layer of the epidermis. It can even predict what a client will look like in five years' time if they don't take action to protect their skin.

Owner Holly Copping is excited to announce the arrival of the all new 7th Generation VISIA Complexion Analysis System, the only one of its kind in the Northern Territory. This revolutionary tool enables their Dermal Therapists to examine the skin in microscopic detail. The VISIA's unique camera technology takes high-definition images of the skin and provides a detailed report of what is happening below the surface.

'It's incredible,' exclaims Holly. 'It enables us to see all the way down to the basal layer of the epidermis. It can even predict what a client will look like in five years' time if they don't take action to protect their skin. It has changed the way we deliver our consultations at Territory Laser Clinic.'

This state-of-the-art imaging system takes a comprehensive snapshot of the overall health of the skin across eight categories: spots, wrinkles, texture, pores, UV spots, brown spots, red areas and porphyrins (bacterial excretions in the pores). The scanner grades the client's skin in comparison to others of the same age and skin type

using the world's largest skin feature database.

'The VISIA is an invaluable tool for our in-depth skin consultations,' Holly affirms. 'The information it provides enables us to devise an individual treatment plan that ensures our clients achieve the best possible results. We can then measure the success of the treatment plan over time using the VISIA.'

All the staff at Territory Laser Clinic are fully qualified Dermal Therapists and can recommend a range of medical-based treatment options for clients' skin concerns including chemical peels, laser therapy, subablative skin rejuvenation, medi-facials, cosmetic injections, and cosmeceutical grade skincare.

So why wait? Book your appointment at Territory Laser Clinic today to discover the true age of your skin and find out what you can do to turn back the clock. Gorgeous, glowing skin is just a phone call away! To achieve truly healthy skin head to Territory Laser Clinic, Suite 28, 119 Reichardt Road, Winnelli e.
