ALLCRAFT CABINETS
attention to detail relies on completely understanding the client's needs for their home. The underutilised benefit of engaging cabinet experts is just that, listen to their advice and ASK for it. The biggest hurdle to the perfect outcome when building or renovating is hubris.

EXPAND YOUR WALK-IN WARDROBE

It may easily seem like a luxury addition but when you think about the organisation of one of your first tasks each day, being simple and easy, you'll be dressed right and feeling a million bucks. Remember to design drawers for everything that currently lies around, cluttering your space.

A SPACE FOR YOUR WINE

HIDDEN TREASURES

A bigger wardrobe is not enough. It is a smarter wardrobe and only you can know it. Start by listing all the groups of clothes items, then numbers of shoes, bags, accessories, luggage and don't forget the space for the laundry basket. Then you're ready to sit with the design team.

Storage is the theme here and doing it in style is the aim. You'll be surprised how much can be achieved with a space, transformed into a servery bar with cupboard space, all seamlessly integrated, and remember if it's your dream home ... DO IT.

STYLE UP YOUR OUTDOOR BBQ

Limited only by imagination, your new home or renovation should sing to your character and be a reflexion of you. How often will you build your dream? A \$5K saving now will haunt you for the rest of your time there.

ADD DESIGNER STORAGE TOUCHES

Make a wardrobe pop with endless laminate choices in an otherwise uninteresting hallway or add interest with glass. Great designed cabinetry will add value to every room and shouldn't be overlooked.

This great example of thinking about everything having a place in each room of the house; an aluminium curtain rod the entire length of the work bench, right where it's needed.

MAKE YOUR LAUNDRY SPACE PRACTICAL
